PROFESSIONAL SUMMARY

Senior Software Development Engineer and Tech Lead with 5+ years of experience building and shipping production-grade mobile and full-stack applications. Proven expertise in Flutter, React Native, Firebase, and MERN Stack (Node.js, Express.js, MongoDB, TypeScript). Currently leading end-to-end product development of an AI-powered image and video generation platform at TechRelieve, with hands-on ownership of architecture, team delivery, and monetization systems. Strong track record in cross-platform app deployment, scalable system design, and leading engineering teams in fast-paced, product-first environments.

TECHNICAL SKILLS

Languages	Dart, JavaScript, TypeScript, HTML, CSS
Mobile Frameworks	Flutter, React Native, iOS (Swift interop), Android
Backend & APIs	Node.js, Express.js, RESTful APIs, Firebase Cloud Functions
Databases & Cloud	MongoDB, Cloud Firestore, Firebase Realtime Database, Firebase Storage
Architecture	Clean Architecture, MVVM, Scalable System Design, Agile / Scrum
Tools & DevOps	Git, GitLab, Jira, Trello, Firebase Console, CI/CD, App Store, Google Play
Integrations	Firebase Auth, In-App Purchases, Video Streaming, AI/ML API Integration

PROFESSIONAL EXPERIENCE

Senior Software Development Engineer (Tech Lead)

Oct 2025 – Present

TechRelieve · Remote

- Architected and led full-stack development of an AI-powered SaaS platform enabling users to generate images and videos via business prompts, using Flutter (frontend) and Node.js + Express.js + MongoDB (backend).
- Designed and implemented a credit-based monetization system with secure usage tracking, credit deduction logic, and tiered feature access control — directly enabling product revenue from launch.
- Engineered scalable backend APIs in TypeScript/Node.js with Express.js, integrating AI-generation endpoints, Firebase Auth, Firestore, and Firebase Storage for end-to-end product delivery.
- Led cross-functional engineering teams across Flutter frontend and Node.js backend; conducted regular code reviews enforcing Clean Architecture and MVVM patterns.
- Owned architecture decisions from database schema design to API contracts, ensuring high performance and scalability for growing user concurrency.
- Drove end-to-end CI/CD pipeline, staging environments, and production deployments on App Store and Google Play.

Senior Mobile App Developer

May 2022 – Sep 2025

- Led a 3-engineer team to deliver Flutter-based iOS and Android apps, managing task allocation via GitLab and Trello to maintain sprint velocity and on-time delivery.
- Communicated directly with clients to gather and translate product requirements into actionable technical specifications and development roadmaps.
- Architected Flutter applications with Firebase (Auth, Firestore, Realtime Database) following Clean Architecture principles for scalable, maintainable codebases.
- Conducted structured PR code reviews, enforcing standards and reducing post-release defect rates through early issue detection.
- Managed end-to-end App Store and Google Play deployment pipelines, coordinating release cycles for zero-defect production launches.
- Mentored junior developers on Flutter best practices, REST API integration, state management, and MVVM architecture.

Junior Mobile App Developer

Jan 2020 – Mar 2022

Arrow Edutech · Sundernagar

- Built cross-platform mobile applications in Flutter and React Native, delivering consistent UX across iOS and Android for the EdTech domain.
- Integrated RESTful APIs and third-party SDKs — authentication, push notifications, and analytics — to extend app functionality.
- Collaborated with product, design, and QA teams in Agile sprints, delivering features on schedule with high quality.
- Conducted unit and integration testing pre-release, contributing to stable, production-ready builds with minimal post-launch issues.

KEY PROJECTS

AI Image & Video Generation Platform · TechRelieve · 2025 – Present

- Built a production SaaS product enabling businesses to generate AI-powered images and videos via prompt-based workflows — Flutter frontend, MERN stack backend.
- Implemented a credit-based billing and access control system with real-time Firestore usage tracking, supporting scalable monetization from day one.
- Integrated AI generation APIs with TypeScript-typed Express.js services and Firebase Functions, targeting sub-2s response times at scale.

DFH Fitness App · Postpartum Women Health Platform

- Developed a Flutter fitness app for postpartum women featuring quiz-based program selection, workout video streaming, recipe database, and weight tracking.
- Implemented in-app purchase subscription model via App Store and Google Play billing APIs, enabling direct revenue generation from launch.

Whitdeal App · Whitsunday Island Deal Aggregation Platform

- Built a React Native deal aggregation app for Whitsunday Island tourists with a freemium user model and B2B subscription model for listed businesses.

- Designed location-based discovery using geolocation APIs, improving deal relevance and driving measurable post-launch user engagement uplift.

EDUCATION

Master of Computer Applications (MCA)

Software Engineering Specialization
